

MANUALLY OPERATED AUTOCLAVE DOORS ARE SOMETHING OF THE PAST

NEW!!!

**“AUTOMATIC OPERATED DOOR”
WITH HIGH LEVEL
SAFETY FEATURES BUILT-IN**

- PLC controlled.
- Electronic safety features in place before opening door – zero pressure, dead man foot switch and mechanical door interlock.
- Low maintenance and local parts used.
- Protection of door seal and ring – consistent opening and closing movement

- Programming of autoclave operations can also be done using PLC.
- Program and notification when Statutory Inspections are due.
- Can be fitted and installed on-site
