

# COMPANY PROFILE

## Steam Generation

With over 50 years of experience specializing in Heat and Energy Generation Technology. Steam Generation Africa is well geared to sell and service a comprehensive range of Boilers, Steam Generators, Hot water vessels, Heat Recovery Boilers, Biomass Co-Generation Solutions and related Spare parts.

All the products and solutions sold are supported by a professional team offering our client base a range of cost effective steam reticulations, installations, after-sales services, repairs, maintenance, spare parts and statutory inspections.

Over the past year, Steam Generation has been awarded some major contracts such as the Thermal Oil Upgrade Project and Natural Gas Pipework for Pepsico Simba Isando Plant.

As well as two new Cochran Wee Chieftain 3000Kg/h natural gas fired boilers complete with Economisers, boiler house equipment, installation, new steam and condensate reticulation, Heat tracing and insulation for Tigerbrands Consumer Isando.

To round off 2016 we have received an order for a new Cochran Coalmaster 8000Kg/h coal boiler, boiler house equipment, installation, and steam and condensate reticulation for Aller Aqua Zambia. The company is the Exclusive Southern Africa Distributor for the full range of Cochran (UK) Steam and Hot water boilers, Economisers, Heat Recovery and Biomass boilers including related spare parts.

Steam Generation is also a reseller and post-sales service company for Riello, Limpsfield, Weishaupt burners and Autoflame Combustion Control System, as well as the sub 2000Kg/h range of Cyclotherm boilers plus related spares.

The company is working closely with energy companies such as Barloworld Power, VYNCKE Biomass Co-Generation Solutions and XANT wind power for small local villages and communities.
