

UltraNOx Burners

1000-24000 kg/hr

Cochran is a leading provider of fully engineered heat and energy solutions across the globe. Operating worldwide, the Cochran brand is a globally recognised benchmark for British engineering and manufacturing; a name that stands for unrivalled quality, dependability, durability and premium performance.

Now, developed from its well-respected and fully proven burner platform, Cochran have launched the new 50mg NOx UltraNOx burner range. Fully MCPD Compliant and Hydrogen ready, this benchmark standard has been achieved without the need for Flue Gas Recirculation (FGR). FGR can be offered to further reduce NOx emissions, where we have achieved results down to 20 mg/Nm³.*

Delivering low operational noise and excellent fuel efficiency across the 4 to 17 MW burner net heat output range, the new 50mg Nox UltraNOx has been rigorously tested in the field. For maximum efficiency and flexibility, the UltraNOx can be offered with all leading combustion control systems.

Cochran's UltraNOx burners offer the following key features:

- Fully MCPD compliant and 100% hydrogen ready burner delivering from 4 to 19 MW burner net heat output. Suitable for firing oil or gaseous fuels including Hydrogen or for triple fuel firing, providing maximum flexibility.
- From 50mg NOx @3% O₂, without the need for FGR*. For maximum efficiency and flexibility, the UltraNOx can be offered with all leading combustion control systems.
- Minimum turndown for Type E burners 8:1 gas and 5:1 on fuel oil*.
- Available as a rapid combustion head upgrade retrofit to existing boiler plant - significantly cutting NOx emissions and reducing CAPEX. Integrated modular options, VSD, O₂ trim, sequencing, remote monitoring also available.
- Low operational noise, featuring a muffler and air intake silencer as standard.
- Premium spec includes laser cut stainless steel flame plates throughout, quick release connections on fuel lines. All key stainless and aluminium parts CNC machined in-house, ensuring superb quality, fit and ease of commissioning.
- Proven design with extensive real-world testing in the field and supported by Cochran's network of highly experienced UK-based service engineers. Cochran's famous build quality, designed, developed, manufactured and tested in-house at our UK factory, with a powder coated finish for maximum durability. Bespoke design solutions and applications available.
